

ASP.Net Web Developer

Job Summary:

This is a permanent, full-time, ASP.Net Web Developer position and is responsible for the development of several key software applications for use by multiple organizations. The ideal candidate will have strong knowledge of web applications and the .Net framework (preferably the MVC framework), as well as the ability to design dynamic and intuitive user interfaces for the products he/she develops. The candidate will develop large scale internet systems that require high availability and performance. Qualified candidates should have 3+ years professional development experience as well as formal training with an ability to work independently as well as collaboratively during the development process.

Organizational Status:

This position reports to the Director of Technology.

Roles & Responsibilities:

- Translate concepts and ideas into viable software applications
- Create software functionality and look-and-feel based on internal direction
- Design and develop software applications throughout the systems development life cycle
- Editing, updating and expanding existing software application functionality
- Ability to work in a challenging and fast-paced environment and manage multiple projects
- Work with QA and support staff before, during, and after deployment
- Meet all assigned deadlines
- Confidence to approach work seriously while maintaining an open-minded approach to collaboration and constructive criticism

Qualifications & Requirements:

- BA/BS in Computer Science or related technical field
- 3+ years professional software development experience
- Solid understanding of object-oriented programming (OOP)
- Competent in ASP.NET & C#
- Competent in HTML, JavaScript, and CSS
- Competent in relational databases & SQL: SQL Server 2005 or 2008/ T-SQL
- Experience in ASP.Net MVC framework a big plus
- Experience using JQuery, JSON, and XML a plus
- Experience with Silverlight and XAML a plus
- Experience with ORM tools; i.e., Entity Framework & LINQ, NHibernate
- Experience with third party UI components (DevExpress) a plus
- Experience using mobile applications
- Experience with WCF/Web services a plus
- Have a logical thought process and excellent design skills
- Be passionate about development and have an interest in emerging technologies

Term:

This position is planned as a permanent, full-time position.
