Summer of Giving Program Announcement
Non-Profits Benefit from Donation of Services

MECHANICSBURG, PA, June 28, 2011 - - In celebration of the summer of 2011, South Central Pennsylvania based Digital Planet announced its "Summer of Giving" program (www.summerofgiving.org) to assist non-profit organizations. The program provides the selected non-profits with a web site presence to further market their mission. Using the web and graphic design resources available from our company, Digital Planet will create customized web sites to further market the needs of each organization. A short grant request form is available from the web site.

"We understand the challenges faced by a non-profit organization during these difficult economic conditions," states Rick Gurba, President. Gurba continues, "Our business is committed to assisting those organizations so they can continue to meet their mission of helping others. This is just one of the many philanthropic ideas originating from our staff members over the past few months."

"Many of our staff members were fortunate to be influenced by individuals that instilled the volunteer and philanthropic spirit into each of them," states Gurba. He continues "Digital Planet is committed to being a good corporate citizen and fulfilling its social responsibility. Its employees share in this commitment. Digital Planet hopes that the response to this new program will be widely utilized. However, as long as one charitable organization benefits, the program will be a success."

About Digital Planet
